BauTeam exclusive front selection

C Collection This fantastic new ceramic surface can be utilized for the smallest internal application in a home or office. Easy to maintain and use, a full body ceramic piece is applied to a CARB 2 compliant particle board with aluminum backing for stability and available with White or Black melamine back finish. Perfect for spaces with extensive exposure to daylight.

Struttura Collection

Inspired by the distinctive structures of natural and man-made textures, we are constantly striving to create unique surfaces that transform the cold, smooth shape and structure of interior surfaces. The geometry of moving water represents to us an example of how to visually represent the dynamics of nature in an interpretive form. Flowing, dynamic shapes give the interior landscape a straight-edge-consuming complexity and elegance, as it is only found in nature. The depth of these structures creates a distinctive and unique play of light and shadow and an unmatched blend of look and feel. Abstraction and reduced aesthetics are important, but they generate an unparalleled sculptural presence. The permanent communication with renowned designers and architects both challenges and encourages us to respond immediately to new trends.
